

LIVE OVERHEAD HYDRAULICS

For Horizontal Machining Centers

- Hydraulic Pump Unit – 1500 psi at 1GPM up to 4000 psi at 3GPM flow
- Live Hydraulic Monitoring Unit
- Double Acting Solenoids
- Air sensing/part detecting
- Custom Hydraulic Hoses with hose management system for APC
- Rotary Joint for top of machining center

**Other options/configurations available; call for pricing and specifications: ex: External PLC with programming, Rotary Unions for top of fixtures, variable pressure systems. Available as 8, 12 and 16 ports per machine with Koma performing onsite installation.

LIVE HYDRAULICS FOR VERTICAL MACHINING CENTERS

- Hydraulic Pump Unit – 1500 psi at 1GPM up to 4000 psi at 3GPM flow
- Live Hydraulic Monitoring Unit
- Double Acting Solenoids
- Air sensing/part detecting
- Custom Hydraulic Hoses with hose management system for standard Machine or Pallet Changer Machine
- Available as 2-16 ports per machine with Koma performing onsite installation
